Introduction

The interaction between Association National Voluntary Forest Certification System (hereinafter referred to as The Association, Association NVFCS) and certification bodies are formed under the principle of two “keys”: one “key” is accreditation and the other one is notification. Accreditation and notification are two different activities to be performed separately. These procedures are administratively separated and performed by different bodies (organisations). This principle is used to ensure a high level of management in National Voluntary Forest Certification System (hereinafter referred to as NVFCS), and notification becomes an important tool to ensure confidence in the activities of the accredited certification bodies and increase their responsibility for the evaluation results.

The first «key» is related to evaluation of independence and competence of the certification body during accreditation to be conducted by the accreditation body being a member of the International Accreditation Forum (IAF). It issues the accreditation certificate to the certification body.

The second «key» is in the hands of the Association NVFCS management, which established additional requirements (conditions) for notified certification bodies. Therefore, the National Voluntary Forest Certification System management does not automatically notify all accredited certification bodies.

This standard specifies the general requirements to be met by an accredited certification body in order to be notified (authorized) as a competent authority to work in National Voluntary Forest Certification System, as well as the requirements for the notification procedure.

This document does not contravene valid international agreements and contracts, national laws, other statutory instruments of the country, statutory instruments of executive bodies.

This standard is based on PEFC GD 1006 PEFC Notification of Certification Bodies operating Chain of Custody Certification in Countries without Authorised Bodies.

NVFCS certification shall be carried out by third party certification bodies, which are accredited by a national accreditation body which is a member or a part of the International Accreditation Forum (IAF) in order to demonstrate its competence and independence. Notification establishes a necessary link between the accredited certification bodies and the scheme owner (Association NVFCS) and allows certification bodies to issue Association NVFCS recognised certificates.

This second edition from the date of publication cancelled and replaced the first edition UA SFM ST 06. The second edition had minor technical amendments relating to PEFC Endorsement process of National Voluntary Forest Certification System.

This third edition from the date of publication cancelled and replaced the second edition UA SFM ST 06. The third edition had minor technical amendments relating to the allocation of the list of PEFC product categories in a separate technical document and the updated Tariffs of Chain of Custody National Voluntary Forest Certification System Notification Fee.

The fourth edition from the date of its publication cancelled and replaced the third edition of UA SFM ST 06. The fourth edition contained the changes recommended by PEFC International regarding the data management procedure in accordance with the data protection and privacy legislation in force in Ukraine, and the updated Tariff of PEFC Forest Management Notification Fee of the National Voluntary Forest Certification Systems.

The fifth edition from the date of its publication cancels and replaces the fourth edition of UA SFM ST 06. The fifth edition contains the updated Tariff of PEFC Forest Management Notification Fee of the National Voluntary Forest Certification Systems.

1 Scope

1.1 This standard establishes the rules and procedure for PEFC Notification to certification bodies, which will be empowered to carry out forest management and chain of custody certification in Ukraine within the National Voluntary Forest Certification System (hereinafter referred to as NVFCS).

1.2 This document is used jointly with other NVFCS documents.
